

# US Air Force Divert Program – Current Update

## **Request For Proposal No. N62742-20-R-1322 (Website: [beta.sam.gov](https://beta.sam.gov)) (\$50M-\$100M)**

**FY19 P-9030 Cargo Pad w/ Taxiway Extension:** Construct a cargo pad including taxiway connections to the airfield runway and other taxiways, lighting and markings, utilities, cargo staging area and all necessary supporting facilities.

**FY19 P-9040 Maintenance Support Facility:** Construct a maintenance support facility. The project includes site improvements, pavements, utilities as well as all other supporting work necessary.

## **Request For Proposal No. N62742-20-R-1313 (Website: [beta.sam.gov](https://beta.sam.gov)) (\$100-\$250M)**

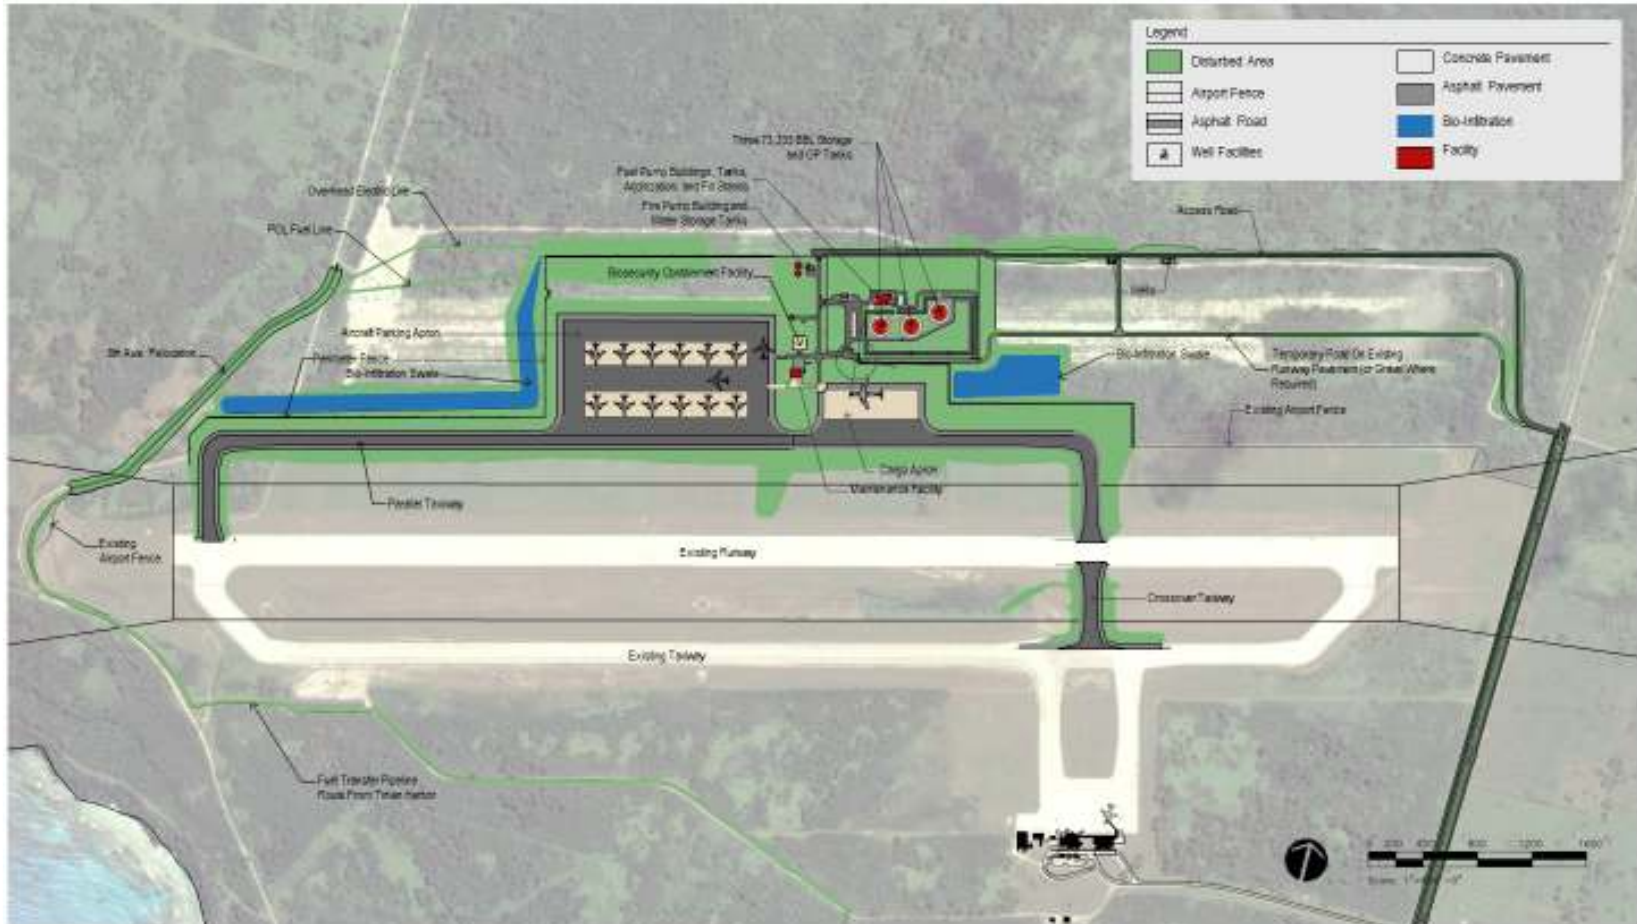

**FY20 P-9021 Airfield Development Phase 1:** This project provides site development, including a cleared and level site with paved road access, security fencing, earthwork, drainage, electrical and water utility connections, repair/improvement of haul route and all other requirements.

**FY20 P-9022 Parking Apron:** Construct an aircraft parking apron and taxiways, with associated shoulders. The parking apron includes hydrant piping and related components to support fuel valve pits.

## **Design Phase**

**FY20 P-9010 Fuel Tanks, Receipt Pipeline and Hydrant System:** Construct new jet fuel system including fuel storage tanks, steel pipelines, pump stations, fire protection, spill control, emergency generators, and parking. The project will include support facilities including electrical, mechanical, HVAC, communications, area lighting and structural work. Awaiting Supplemental Environmental Impact Statement (SEIS) completion.
